

Based on large storm – and in support of community efforts to reduce coronavirus exposure – MID will temporarily pause water deliveries

March 20, 2020

Based on recent rain and storm activity, Merced Irrigation District will temporarily pause water deliveries and orders. This will support the District and the community's efforts to reduce the spread of COVID19, now appearing in Merced County.

MID is an essential service and is continuing to operate all water and energy facilities while using this weather-condition opportunity to reduce spread of the coronavirus. The current storm and weather conditions provide an opportunity to reduce overall impacts to growers, conserve water and strongly support our community during a difficult time.

MID is continuing to monitor and assess the conditions each day and will make adjustments to operations as needed.
