With the 2022 growing season coming to an end, Merced Irrigation District will continue water deliveries through October 31. Growers are urged to make their final orders before Thursday October 27.

“With less water in the system this time of year, it is important that we are able to plan ahead for final deliveries,” said Bryan Kelly, Deputy Manager of MID Water Resources. “Thanks to the coordination between our operations staff and growers, we’ve had a successful season. We are seeking to finish the season strong.”

Options for ordering water include:

- Orders may be placed anytime online at [www.mercedid.org](http://www.mercedid.org).
- Orders may be placed anytime using MID’s automated water ordering system at (866) 825-2475.
- During weekday business hours, orders may be placed by calling MID Customer Service at (209) 722-2720 or toll-free at (800) 750-2720.
