MERCED IRRIGATION DISTRICT
WATER & POWER

**EMPLOYMENT OPPORTUNITY**
**ENGINEERING INTERN**

**HYDRO ELECTRIC FACILITY**
**$23.00 to $27.00 per hour DOQ**

The Merced Irrigation District (MID) is seeking self-motivated and qualified individuals to fill one (1) Engineering Intern position at our Hydroelectric facility, located at Lake McClure, in Snelling, California. The intern should expect to work full-time hours; Part-time hours will be considered for non-summer break periods to accommodate education. The intern will be assigned to work on various projects within the Hydroelectric Department. Candidates with interest in Civil, Mechanical or Electrical engineering fields are encouraged to apply.

The qualified candidate must be enrolled in an program leading to a degree in Engineering or have recently graduated from a four (4) year college or university with an emphasis in Engineering; have demonstrated skill in preparing written and oral reports; have the ability to apply research methods and quantitative analytical techniques; have the ability to communicate clearly and concisely; have the ability to work with minimal supervision; have the ability to follow oral and written instructions; and have the ability to work cooperatively with others.

To apply for this position, please refer to the "Employment Application Instructions and Guidelines" found on the "CAREERS TAB" on the Merced Irrigation District website at www.mercedid.org. Applications will only be accepted through the online system.

**New users must set up an account at:**
**https://Merced.accessgovernment.net/ApplicantTracking**
**Assistance with this new feature can be obtained in Human Resources**

Applications will be accepted until 5:00 p.m. March 31, 2025. The passing of a Basic Skills Test, pre-employment drug screen and background investigation are required for the successful candidate.
